SUMMARY

Senior Frontend Engineer with over 10 years experience in building SaaS products. Strong passion for functional UI/UX, clean design, and optimizing for performance and accessibility.

TECH

TypeScript, JavaScript (ES2015+), React, Next.js, Redux, Xstate, Jotai, HTML5, CSS3, Tailwind CSS, SCSS, Material UI, React-aria, ShadCN, Accessibility (ARIA, WCAG), Performance Optimization, Google Lighthouse, Storybook, Jest, Cypress, ProseMirror, SQLite, Prisma, REST APIs, GraphQL, Tauri, Vue.js, Angular, jQuery, npm, Yarn, Vite, Webpack, Monorepo Tooling (nx), Github Actions, CI/CD, ESLint, Prettier

WORK EXPERIENCE

Senior Frontend Engineer, Moment Technologies

May 2025 - Present

- Developed greenfield Next.js application that allows users to publish docs on the web with custom templates and mobile optimization.
- Developed a document sharing feature which allowed the product to be monetized by creating paid user workspaces and live collaboration on docs.
- Improved product load times from 10-15 seconds to under 5 seconds by migrating the frontend state management from XState to Jotai and prioritizing async operations.
- Built a design system utilizing react-aria components as a base to reduce UI bugs and improve feature launch time which enabled the team to ship new features weekly.
- Improved overall product stability, performance, and security by finding, testing, and resolving platform-level bugs across the product.

Senior Frontend Engineer, AS Software

Mar 2023 - May 2025

- Architected a new product allowing users to securely save and share ultrasound images throughout their pregnancy enabling \$15mm in sales for new clients.
- Migrated many unsecure, slow performing, and unstable features of the product to improve user experience, code maintainability, and speed optimization decreasing build, load, and deployment times by 30-40%.
- Implemented comprehensive testing practices across the products including CI/CD automation, visual regression, accessibility, and E2E testing reducing regressions and ensuring product quality on every release.
- Modernized the frontend tooling including implementing NPM, Github Actions, ESLint, and Prettier in order to support faster development and FDA compliance.

Senior Frontend Engineer, Mythical Games

Apr 2022 - Nov 2022

- Developed a multi-tenant website platform that hosted all games supported with a design system, URL based middleware to hydrate content, and ensuring responsive design which enabled customer onboarding to happen in a single day.
- Led and developed a new NFT Inventory feature by integrating blockchain metadata APIs, user authentication, and state management crucial to revenue from consumers.
- Worked closely with design, product, clients, and other stakeholders to optimize for performance, accessibility, and sales conversions.

Senior Frontend Developer, Intouch Solutions

Aug 2019 - Mar 2022

- Developed and maintained applications ensuring seamless functionality, FDA Compliance, and clean UI/UX representing \$30mm in yearly client revenue.
- Spearheaded efforts to modernize technical standards including accessibility and the adoption of modern tools such as webpack to accelerate developer output.
- Consistently achieved Lighthouse scores above 90 in all categories for all client websites to improve user experiences and client satisfaction.
